Education

Birla Institute Of Technology Mesra

Bachelor of Technology in Mechanical Engineering(Major) and Computer Science (Minor)

July. 2018 – May 2022

Ranchi, Jharkhand

Technical Skills

Backend: Python, FastAPI, REST API Development, Async Programming, Microservices Architecture

Frontend: React.js, Redux / Context API, JavaScript (ES6+), HTML5, CSS3

Databases: PostgreSQL, SQL, Stored Procedures, Database Functions, Query Optimization, Indexing

Cloud and DevOps: AWS (EC2, RDS, S3, CloudWatch), Docker, CI/CD Pipelines

Methodologies: Agile Scrum, Test Driven Development (TDD), Microservices Architecture

Experience

Airbus

August 2022

Software Engineer

Bangalore, Karnataka

- Designed and developed high-performance REST APIs using FastAPI, supporting asynchronous processing and handling thousands of concurrent requests.
- Built scalable microservices-based backend architecture improving system maintainability and deployment speed.
- Developed responsive and dynamic React.js frontend applications with reusable components and efficient state management.
- Implemented PostgreSQL database functions and stored procedures to process complex business logic at the database layer, improving API response.
- Optimized SQL queries using indexing strategies, query execution analysis, and schema optimization.
- Containerized backend services using Docker ensuring consistent development and production environments.
- Deployed applications on AWS EC2 with PostgreSQL on AWS RDS, improving scalability and reliability.
- Implemented Swagger/OpenAPI documentation for APIs to improve collaboration across teams.
- Built CI/CD pipelines for automated build, testing, and deployment.

Projects

High Performance API Platform | *FastAPI • PostgreSQL • Docker • AWS*

June 2022

- Designed asynchronous REST APIs using FastAPI capable of handling high traffic requests.
- Implemented PostgreSQL stored procedures and database functions to execute complex business logic inside the database.
- Reduced API latency from 400ms to 120ms by moving logic to database functions.
- Containerized backend services with Docker and deployed on AWS EC2 infrastructure.
- Implemented JWT authentication and role-based access control (RBAC).

Microservices Task Management System | *FastAPI • React • Docker • AWS • PostgreSQL*

January 2021

- Developed microservices architecture using FastAPI enabling independent service scaling.
- Built React frontend dashboards with role-based access control.
- Implemented PostgreSQL triggers and DB functions to automate workflow updates.
- Deployed containerized services using Docker on AWS cloud infrastructure.

Real-Time Analytics Dashboard | *React • FastAPI • PostgreSQL*

October 2020

- Built a React-based analytics dashboard displaying real-time business metrics.
- Designed backend APIs using FastAPI async endpoints to process large datasets efficiently.
- Implemented efficient pagination, filtering, and caching mechanisms for large API responses.
- Developed reusable React components and interactive data visualizations.

Certifications

AWS CLOUD

3 years

Practitioner

Amazon

- AWS-certified beginner; seeking to enhance with practical cloud projects and advanced credentials.
